**RE: Comments of Constellation Energy Group, Inc. on the Department of
Energy Resources' Proposed Final Regulation 225 CMR 14.00 –
Renewable Energy Portfolio Standard – RPS Class 1**

Dear Ms. Andrews:

Pursuant to the Notice of Public Comment Period On Proposed Final Regulation issued by the Department in this matter, Constellation Energy Group, Inc. ("Constellation") offers the following brief comments on the proposed final regulations to implement the Solar Carve-Out Program ("Solar Carve-Out"). Specifically we believe that the Department has correctly interpreted the recent amendment to the program signed into law by Governor Patrick as part of Chapter 240 of the Acts of 2010 which increases the cap for eligibility from two to six megawatts. As both a solar developer and as a purchaser of SRECs we are anxious for the Department to amend its regulations as soon as possible to conform to the new statutory provisions and to remove any legal ambiguity which could delay the development of solar projects between 2 and 6 megawatts or otherwise inhibit the market for SRECs from such projects. Expeditious action on these "housekeeping" amendments to the Department's rules will facilitate our business within the Commonwealth and will enable us to move forward with transactions that are in furtherance of the goals of the overall solar carve-out program.

Thank you for the opportunity to comment. Please contact the undersigned below if you have any questions.

Sincerely,

Daniel Allegretti
